## TECHNICAL SKILLS

- Python
- C++
- Firebase
- MySQL
- OOPs
- Data Structures
- React JS
- Flutter

## EDUCATION

### Sagar Institute Of Research And Technology, Bhopal

Computer Science Engineering | B. Tech

8.29 CGPA

August 2019-May 2023

### B.M. Convent Sr. Sec. School, Ganj Basoda

Class 12th | CBSE

April 2017-May 2018

## PROJECTS

### Medicine Searching Website

March 2023 - April 2022

[Github Link](#)

[Website](#)

In this Website, User can search for any medicine in their city and all the registered medical store in that city will see a post on their dashboard where they can accept the request if they have that medicine in their store. User can see the details of the Store which have accepted the request for that particular medicine. This works in realtime using firebase firestore database. Technologies Used: HTML, CSS, JavaScript, Firebase Auth, Firestore.

### A memory testing game using Pygame Module in python

November 2022 - December 2022

[Github Link](#)

It is a memory game which tests the players's ability to memorize large number or pattern sequences.

As the size of number increases, the player advances to further level and gaining points. The game ends when wrong sequence is entered.

### A Task Manager WebApp using React Js

August 2023 - September 2023

[Github Link](#)

[Website](#)

A realtime taskmanager where users can add tasks with due date and description. Users can also assign tasks to other users. Users can collaborate, edit, delete the task and also add comments on the task. The database and authentication is done using Firebase.

## CERTIFICATIONS

- Flutter Complete course from Udemy
- Data Structures and Algorithms from geeksfor geeks

## HOBBIES

Badminton, Chess, Graphic Designing, Photography, Anime, Gaming and Esports.
